

Training and Evaluation Grantees' Outcome Measurement Tools and Methodology

Outcome Measurements Used by SAMHSA's CMHS Training and Evaluation Grantees - 2005 (Implementation of Evidence-Based Practices by State Mental Health Agencies)							
State	EBP	Instrument	Additions/Subtractions to Instrument	Frequency	Method	Measures	Quality Assurance
IN	IMR	Consumer Outcomes Monitoring Package (COMP)		Data collected monthly and reported to research team quarterly.	Computerized data base. IMR staff complete monthly report using laptops provided by the grant.	Hospitalization, housing, substance abuse, employment and incarcerations.	Quarterly reports, including data from all programs are distributed to all programs
		Illness Management and Recovery Ratings -- consumer version		Consumer initiation of service, then every 6 months for two years.	Self-administered -- provider asks consumer to complete the pack. The pack is mailed to the research team.	Consumer's understanding of illness, effective illness management techniques, substance use, and socialization.	None yet. Plan to build a reporting structure like the COMP to feedback average scores over time.
		Satisfaction with services	Satisfaction with Services				
		Hope (Snyder's scale)	Consumer's ability to see hope				
		Illness Management and Recovery Ratings -- clinician version		Baseline and every 6 months for 2 years.	Self-administered	Clinician's assessment of consumer's understanding of illness, effective illness management techniques, substance use and socialization	
IL	IDDT	Client Outcome Quarterly Report Form		Every 6 months	Clinician report	EBP involvement, homelessness, incarceration, hospitalizations, substance use, housing, educational status	
		Substance Abuse Treatment Stage Scale (SATS)		Every 6 months	Clinician report	Consumer stage of substance abuse treatment	
		Mental Health Treatment Stage Scale		Every 6 months	Clinician report	Consumer stage of mental health treatment	
		Clinician Alcohol Use Scale		Every 6 months	Clinician report	Consumer level of Alcohol Use	
		Clinician Drug Use Scale		Every 6 months	Clinician report	Consumer level of Drug Use	
		Global Assessment of Functioning		Once	Clinician report	Consumer symptom level	
		Quality of Life Self-Assessment		Every 6 months	Consumer interview	Consumer socialization, physical health, independent functioning, substance use and mental health symptoms.	
		MHSIP -- consumer survey		Every 6 months	Self-administered -- enrolled consumers	Satisfaction with services and good outcomes from services	
		Stages of Change		Every 6 months	consumer interview -- enrolled consumers	Intention to change substance use behavior	
VT	IDDT	DDMHS MIS system		Baseline and every 6 months	Computerized data system for consumers with a substance abuse disorder that tracks a variety of indicators.	Hospitalization and employment rates, course of treatment, service utilization, and criminal involvement.	

Training and Evaluation Grantees' Outcome Measurement Tools and Methodology

		Developing standard outcome monitoring					
OH	SE	GOI - Penetration Item	Separate outcome to be tracked	Every 6 months until grant is completed	See GOI Fidelity Scale information.	Agency-wide penetration rate & "project" penetration rate	
		Employment variables list		Baseline & every 6 months until grant is completed	Data are requested from the agency; gathered by Implementation Monitor	Employment rates, changes in measurement of employment rates, etc.	
		Ohio Mental Health Consumer Outcome Survey - Adult Form A & Provider Form A		Baseline & every 6 months until grant is completed	Outcome items &/or scales used specifically to monitor SE implementation are selected by the agencies.	Extent to which agency tracks consumer outcome data; extent to which staff use consumer outcome data in recovery planning. Examples of agency-selected items/scales = Consumer & provider reports about Employment; Empowerment, Quality of Life, Functioning; Symptom Distress.	
		Multi-Agency Community Services Information System (MACSIS)		At end of grant period	Agencies will be asked to report costs of services over the course of the project	Changes in costs of MH services	
CA	IDDT	Alcohol Use Scale	Revised	Every 6 months	Completed by clinician or case manager	Alcohol Use from abstinence -- institutionalized dependence	Results fed back to individual sites and summaries to all sites at quarterly development team meetings.
		Drug Use Scale	Revised	Every 6 months	Completed by clinician or case manager	Drug Use from abstinence -- institutionalized dependence	Results fed back to individual sites and summaries to all sites at quarterly development team meetings.
		Substance Abuse Treatment Scale (SATS)		Every 6 months	Completed by clinician, case manager or treatment team	Assigns consumer to a level of treatment used in designing appropriate interventions	Results fed back to individual sites and summaries to all sites at quarterly development team meetings.
		Multnomah Community Abilities Scale		Every 6 months	Completed by clinician, case manager or treatment team	Changes in consumer functioning in multiple domains including AOD	Results fed back to individual sites and summaries to all sites at quarterly development team meetings.
		Management information system based outcomes including attrition, inpatient and crisis utilization		Every 6 months	Deidentified data matched to clinician ratings by county MIS staff	Inpatient, crisis, attrition, dollar and unit inputs	Results fed back to individual sites and summaries to all sites at quarterly development team meetings.
HI	IDDT	Coping Skills Scale					
		Mental Health Confidence Scale				Consumer functioning	
		Semi-annual Consumer Outcomes Form: Service Utilization, Substance Use, and Potential Harm				Consumer use of services, alcohol and other drug use, potential harm, and risky behavior	
		Quality of Life Interview				Consumer Quality of Life	
		IMSR Client Self Rating Scale				Consumer functioning	
NY	FPE	Family Member Baseline Assessment				Family's perspective on consumer functioning	
		Post Training participant Survey				Provider knowledge of FPE	
		Pre-Training participant Survey				Provider demographics and knowledge of FPE	

Training and Evaluation Grantees' Outcome Measurement Tools and Methodology

MD	ACT	Consumer Outcomes		Baseline, every 6 months	Interview with staff member; can be used in treatment planning	Psychiatric symptomatology, housing, functioning, employment, hospitalization and ER visits. Includes the Lehman Quality of Life Interview, GAF, SOFAS. Includes items from MD's Outcomes Management System	
		Consumer Satisfaction questionnaire		Baseline, every 6 months	Collaboration with a statewide consumer advocacy agency, which hires self-identified consumers to conduct interviews in the community	MHSIP questionnaire with additional questions developed by consumer advocacy organization and specific questions re: perceived cultural competence of providers
